

Introduction to the Product Range

PU 4502/B05

- Textile lamination, non-pilling fabrics, underwear
- High initial tack
- Low viscosity to give consistent spray pattern
- Permanent bonding and wash resistant
- Solids: 40%
- PU4755 is higher UV resistant version of PU4502/5OB

PU 4650/20

- Liquid applied polyurethane adhesive for discontinuous pressing
- Suitable for bonding domestic scouring pads
- Very flexible bond line
- Suitable for bonding cellulose fibre
- Solids: 100%

PU 40300/40 & /90

- Production of domestic scouring pads
- Good wash resistance
- Low viscosity to give consistent spray pattern
- Solids: 40%
- Solvent System: Methylene Chloride, Ethyl Acetate

PUR 5025

- PUR Reactive Hotmelt
- Production of domestic scouring pads and textile lamination.
- Good wash resistance
- Low viscosity to give good coverage
- Solids: 100%
